

# COMPUTER SCIENCE RESUME

## CAREER OBJECTIVE

Recent Computer Science graduate seeking to use my experience in python, JavaScript among others to help develop experience in an entry-level position in a Tech firm. Possess about a 1 year of hands-on experience building and testing an application for a database management system in react

## EXPERIENCE

### SOFTWARE ENGINEERING INTERN

*Dalhousie youth support services , Peterborough, September 2019–May 2020*

- Used React to help create an app for managing youth services
- Helped in debugging and maintenance of database and error correction.
- Leveraged my knowledge of Java and css with the help of react write interfaces to manage backup log data
- Fixed bugs in the app contributing to an overall 10% reduction in the sorting and searching of youth clients in the database.

### Cois 2240 and COIS 3040

*Trent university Peterborough ,  
January 2020– may 2020*

- helped with marking and comments to help students improve their code.
- Invigilated exams and help grade exam papers
